### ABOUT ME

**Birth date:** 04.02.1994.

**Hobbies:** volleyball,  
kitesurfing, reading, gym...

## WORK EXPERIENCE

### Front-end Developer at VHUG, 2023 - April 2025

- Worked with **Vanilla JavaScript** in combination with **Contao** and **TYPO3** CMS to create custom, dynamic websites and features, collaborating closely with the design team to craft user-centric solutions for German clients, including globally recognized brands.
- Focused on performance optimization, animations, and accessibility, ensuring smooth user experiences across all devices while adhering to the latest **SCSS** practices for scalable and maintainable styles.
- Leveraged **Figma** to collaborate with designers in creating visually appealing, responsive designs that balance client needs with long-term maintainability.
- Developed and maintained an **Angular** app integrated with **Firebase** for internal resource management, streamlining workflows and improving team collaboration. Focused on delivering a seamless, user-friendly experience with real-time data syncing.

### Front-end Developer at Vega IT, 2021 - 2023

- Worked on projects using mainly **Vanilla JavaScript** and **React** in lesser extent creating fully custom front-end, integrating with CMS platforms like **Umbraco** and **Salesforce** for clients in the UK and the Netherlands.
- Maintained and improved a **Webpack** project starter, widely used across the company to streamline front-end development.
- Provided mentorship to interns, guiding them in best practices and front-end development workflows.

## CERTIFICATIONS

### OOP Programming and Front-end web development

FTN Informatika, 2018-2019

Covered core OOP concepts in Java for building reusable code.

Front-End Development focused on Sass, Vanilla JavaScript, and Angular for creating responsive, dynamic web applications.
